Text Ready:	No		
Secure Data Portal:			

⌄ Description

1 As a user I want to login into the application using my credentials and if I am not already registered and don't have credentials then want to register.

2 As a user after login in want to see the list of patients from which I can select one also want to add patients into the existing list.

3 As a user after selecting one patient I want to see the list of charts for that patient in ascending order according to the time when details of that patient like blood pressure, pulse rate, temperature, etc. were entered also want to add a new chart for the selected patient.

4 As a user I want to view a chart from the list of charts of a particular patient and if I want to edit the details after clicking on edit button details should open in edit mode.

5 As a user if I edited the details of a chart from the chart list of a particular patient then after clicking on update button on the edit chart page the updated details should be submitted and show in view chart page.
